

Town of Whitsett Water/Sewer New Connection Application

New Connections: Confirm by a Utility Service that Water and/or Sewer Utility Service exists.

New service connection (lateral need only)

Water: Connection to existing public water main; Lateral Lines to property line.

Sewer : Connection to existing public sewer main; Lateral to edge of roadway or limit of the public sewer utility easement

NOTE: If there is no water or sewer main or lateral in place that connects to your property; you must hire a PRIVATE, LICENSED UTILITY CONTRACTOR for the state of NC at your own expense to purchase and install a meter, meter box, sewer cleanouts, main, lateral lines. The Town of Whitsett does not provide this installation service. The Town of Whitsett will supply the water meter for the size requested once all fees have been paid.

The utility contractor must contact the Town Manager for the issuance of the DCC so proper County Permits can be obtained before any installation can start.

If any additions / modifications to current water or sewer main lines or connections a new application must be approved , fees paid in full and permits obtained before alterations/modifications can start.
